Introduction

This index to Tyler County Deed Records was made primarily to assist those interested in family history and genealogy. The names were alphabetized without regard to the date of the transaction, and the index was divided into two books. Book One contains the Direct Index which records those transactions involving the granting or selling of property. Book Two contains the Reverse Index which is comprised of those persons who received the grants or purchased property.

Deed records are available on film for most counties; however, the films may not be complete. For instance, the filmed deed records of Tyler County begin with Book A and extend through Book N, covering the period 1846 to approximately 1885. A complete set of records is available in the Clerk's office in each county.
